

Version 54 - The phone format description in the open API

Date: 19.10.21.

IMPROVEMENTS

1. Hint for phone number entering during registration through the open API.

During user registration through the open API, there will be a description with information in which format you need to enter the phone number.

Phone format

Senet Server API accepts `phone` as string formatted according to `+[country code][area code][phone number]`. For example:

```
+79012345678  
+38012345678  
+01234567890  
+98765432100
```

BUG FIXES

1. Fixed bug, related to display of cashier sessions in the *Cashier shifts* tab.
2. Fixed incorrect data displaying in the content usage tab.
3. Fixed the bug, when ad banners weren't clickable in the client shell.
4. Fixed situation, when the modal window for payment method selecting was not displayed on the club card at the end of postpaid session.
