

Version 49 - Adaptive admin panel design

Date: 27.07.21.

NEW FEATURES

1. Optimization of the admin panel design.

We have improved the design of some admin panel elements, such as the login menu, the main page, and the modal windows, which open on the club map, so now the admin panel is convenient for usage on various devices with different formats.

2. Hidden page of the deleted user.

An error, that appears during opening the profile's page of a deleted user from his session history or from balance, has been fixed. Now the deleted client's login is not clickable, and his profile's page is hidden.

BUG FIXES

1. Fixed incorrect translations of the names of additional services in the subscription.
2. Fixed a bug with creating a check in the admin panel.
3. Fixed a situation when the product filter by category in the client part worked incorrectly.
