

# Version 47 - Automatic cancellation of orders

Date: 12.07.21.

## NEW FEATURES

### 1. *Transparent order management process.*

For the correct accounting of the balance of goods in the stock and shortage controlling, a new parameter was added using which you can activate the automatic cancellation of unpaid orders, made in client side, and set the time period after which this process will start. This means, if a client made an order from the client part and did not pay for it within, for example, 60 minutes, then once this period ends, the order will be canceled, and the item will be returned to the stock.

The screenshot shows the 'Shop' interface with a navigation bar containing 'Orders', 'Goods', 'Services', 'Movements of goods/service', and 'Archive'. A 'Settings' icon is visible on the right. Below the navigation bar, there are two dropdown menus, one containing 'atlantida' and another empty. A 'Display: New, In progr...' dropdown is also present. The main content area is divided into four columns: 'New', 'In progress', 'Done', and 'Canceled'. Each column contains order cards with the following details:

Time	Status	Order ID	Amount	Units	Customer
5:59 PM	Paid	#1089	5.00 USD	1 unit	Lulu
1:35 PM	Paid	#916	5.00 USD	1 unit	admin
10:56 AM	Unpaid	#1283	5.00 USD	1 unit	Taimurr
11:19 AM	Unpaid	#1284	4.00 USD	1 unit	Taimurr
1:06 PM	Paid	#1059	80.00 USD	4 units	enestech
1:51 PM	Paid	#1048	10.00 USD	1 unit	Lulu
10:54 AM	Unpaid	#1282	7.00 USD	1 unit	Taimurr

*To set up this option, please contact our support team.*

## IMPROVEMENTS

### 1. *Analyze the dynamics of unpaid orders using X- and Z-reports.*

The "Not paid" field has been added to the X- and Z-reports, where will be displayed the number of unpaid goods, sold through the client shell.

## **BUG FIXES**

1. Fixed the situation when it was impossible to select a printer during rate creating and when trying to print in the Senet Printer application.
2. Fixed the situation when the minimum payment continued to work even after it's deactivation.
